

Instrument Tune-Up

Fondriest Environmental Service & Repair Department

when your
research
demands
quality data

Fondriest Environmental offers excellent turnaround times and low service costs on YSI 6-Series sondes & displays, Professional Series & 556 multi-parameter meters, and all other YSI handheld water quality meters. Tune-Up Service covers all repair labor in addition to:

Seal Inspection & Cleaning

Seals are cleaned of any contamination that may cause leakage. Damaged or missing o-rings are replaced.

Cable Inspection & Testing

The cable is subject to a vigorous flex test to check for shorts. Connector and ports are cleaned of any moisture and corrosion.

Sensor Reconditioning & Calibration

Sensors are reconditioned and calibrated so they are ready for use. New DO membranes are installed with fresh electrolyte solution.

Circuit Board Performance & Upgrade

Circuit board performance is verified using a resistor box. Software is upgraded to the latest version.

\$99

-550/550A -85
-63 -60
-55 -30

Evaluation and Repairs

Upon receipt of the instrument, repair technicians will perform a free evaluation and send a detailed evaluation report and price quote via email to the point of contact.

Repairs are based on customer feedback and are performed only after approval is received.

All repaired instruments are returned with a Calibration Report to confirm that system parameters meet factory specifications.

Call our Service & Repair Department at **888.426.2151** or email customercare@fondriest.com for more information.
